

Elite Medical Alliance Inc.

October 12, 2017

Dear patient,

On behalf of our team at Elite Medical Alliance Inc. it is with deepest sadness that we announce our plans to close our outpatient center in Aventura as of November 2017. This decision has been one of the most challenging decisions of our professional life and one that we, at the leadership level, have been struggling with for quite some time.

As the paradigm of healthcare has changed towards a managed care capitation model, much of the insurance industries have limited their network providers mainly to the corporations with strong political and financial strength. These changes have profoundly impacted many small medical practices in our community and around the United States, leaving us with no other options but such as the one we are making today.

After four year of constant efforts, our inability to participate in any of the major Medicare advantage networks has become a significant source of limitation for expansion and financial sustainability. This decision does not stem from our lack of interest in your care, but solely from absence of a practical financial path to maintain the same level of care without undermining quality of your care. We simply refuse to compromise our quality of care and prefer not to perform under these conditions. Please be assured that we remain committed to you and work diligently to uphold our promise of excellent quality till the last hours of our operation.

With the aim of assisting you with the challenging task of finding a suitable primary physician, we have taken the liberty to include the names of a few physicians in this community whom we believe can provide you with excellent continued medical care. Our staff is here to assist you to the best of their ability. We request that you arrange your appointments in a timely fashion. (In the next 30 days from the date of issuance of this letter). Any delays might result in unnecessary interruptions in you care. Should you need any assistance, please contact our office promptly to receive aid with your transition.

The following is a list of physicians who we trust will take excellent care of you:
